

# HygroChlor

## *DUST CONTROL LIQUID*

**Don't let the wind blow your road away!**

**HygroChlor** is a blended Calcium Chloride dust control liquid with an added wetting agent for better penetration along with dual corrosion inhibitors to reduce corrosion of your equipment. It includes an added amber carbohydrate binder to add stiffness to the substrate while also serving as a pattern indicator. The hygroscopic quality of Calcium Chloride allows the material to keep replenishing itself from the humidity in the air which means it minimizes dust for a long time.

Roads \* Gravel Pits \* Mines & Quarries \* Parking Lots \* Grain Elevators

Dosage Rate - Unpaved Roads - .35 gallons per square yard
